Date: 2025-04-22

Time: 22:20:06

Patient Information

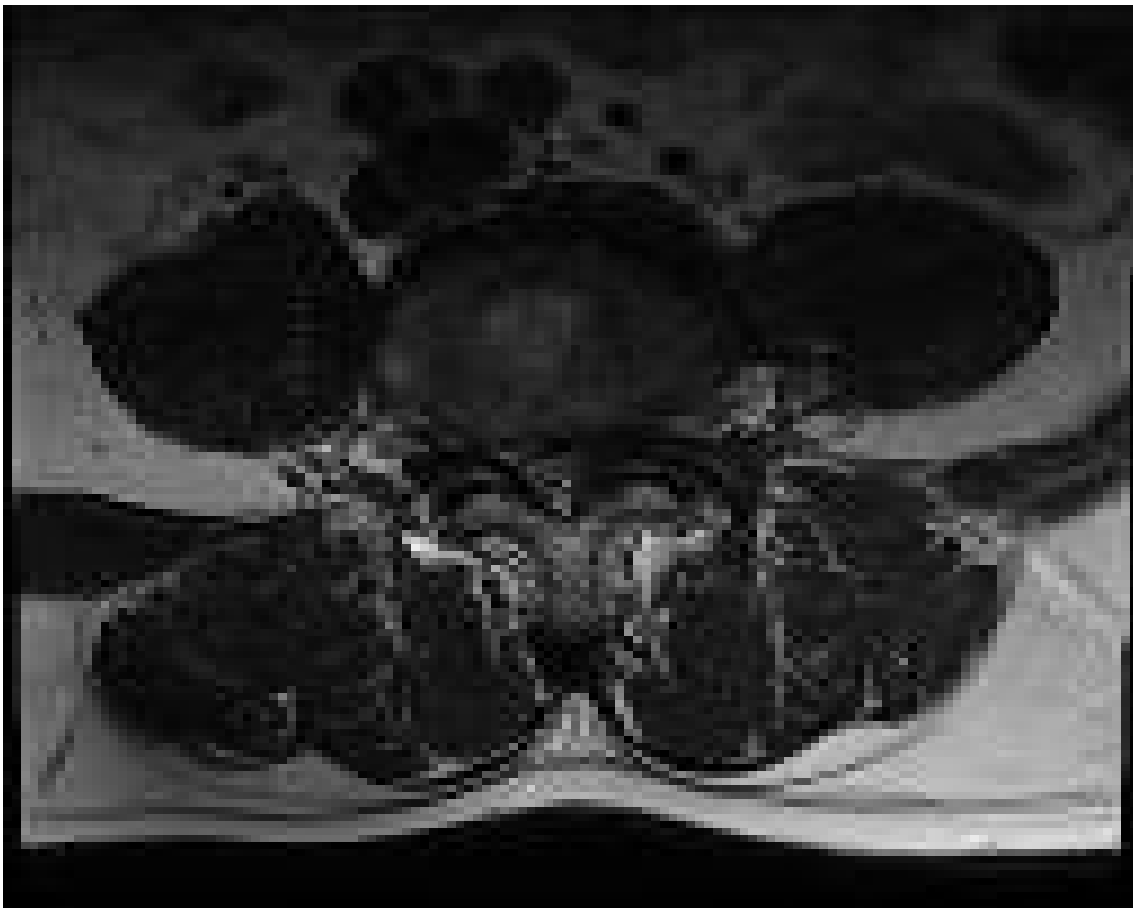

Patient ID: 10

Full Name: RK

Age: 15

Gender: Male

CT Scan Image

Severity: Severe

Medical History

Date	Time	Severity Level
2025-04-22	22:20:06	Severe

Recommendations

The condition is classified as severe, which indicates significant degeneration or other serious findings in the lumbar spine.

It is strongly advised that the patient consult with a spine specialist as soon as possible for a comprehensive evaluation and possible surgical intervention.

The risk of permanent damage to the spine increases in severe cases, so early intervention is crucial.
